

Miracle of the Moon

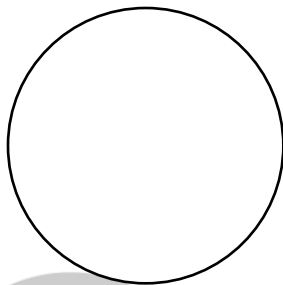

Age: 5-7 Years

Assalamu alaikum, children! The moon and sun were created by Allahﷻ to circle in their orbit and create night and day. Allahﷻ says in the Qur'an that He made the moon a derived light from the shining light of the sun. The moon also has different phases whose complete cycle looks like an old date stalk. These different shapes of the moon have long been studied by scientists, but before anything, Allah had already mentioned in the Qur'an about it, SubhanAllah! Let's do this interesting worksheet and learn about the different phases of the moon.

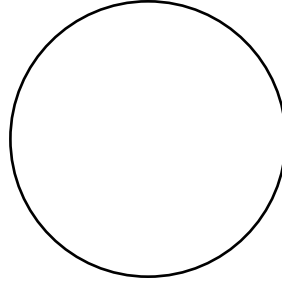

Below are 8 circles. Colour each one accordingly to show the different phases of the moon.

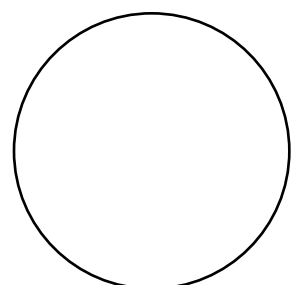

New Moon

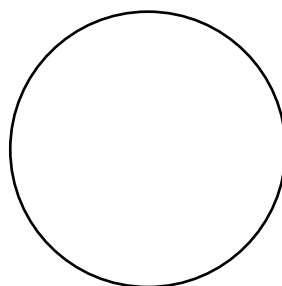

Waxing Crescent

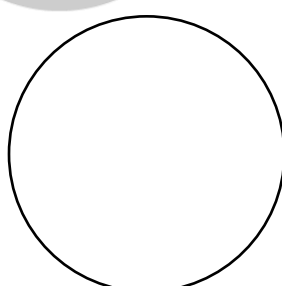

First Quarter

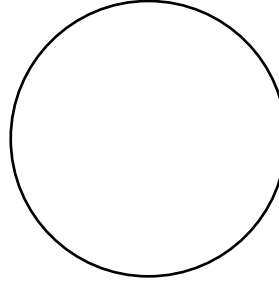

Waxing Gibbous

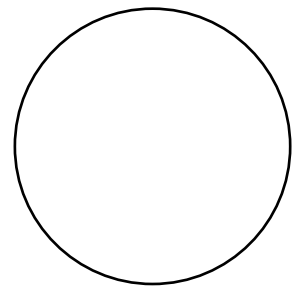

Full Moon

Waning Gibbous

Third Quarter

Waning Crescent
